Object-oriented programming language,
advanced mathematics, physics and electronics principles

Cover Letter

I am excited to apply for the position of front-end developer.
As a team player and code refactorer, I like to not only executing tasks, but also understanding the product and contributing to its success.
I have good skills and experience in development, like problem solving, attention to detail, and strong communication skills. My background in web design and UX gives me a unique perspective and allows me to create visually appealing and user-friendly features that align with the company's objectives.
I am confident that I can make a valuable contribution to your team.
My personality aligns well with the dynamic and innovative culture of start-ups like companies and I am eager to join and be a part of your team.
